## Franklin FTSE Germany ETF

### Analyst Report

The Franklin FTSE Germany ETF (FLGR) tracks an index of large and mid-size companies in Germany. FLGR offers broadly similar exposure to the iShares MSCI Germany ETF (EWG), with a slightly deeper portfolio and more exposure to mid cap stocks. FLGR's management fee is a fraction of the price of EWG, but it trails its iShares rival in assets and liquidity.

The fund is part of a series of single-country ETFs that Franklin Templeton began rolling out in 2017. The funds debuted with significantly lower management fees than rival iShares funds, which have long dominated the single-country ETF space. Many of the stocks in the fund's portfolio are likely to be found in regional ETFs as well as emerging- and developed-market funds, and investors should be careful not to take on an unintentional overweight. Single-country funds are typically not appropriate for investors seeking a diversified portfolio and are more appealing to short-term traders placing tactical bets on specific markets. Given the relatively narrow country-specific focus of this ETF, FLGR may be most useful to those looking to establish a tactical tilt towards Germany or implementing a country rotation strategy.
