Fidelity MSCI Consumer Staples Index ETF

Analyst Report

The Fidelity MSCI Consumer Staples Index ETF (FSTA) offers exposure to the consumer staples sector, making it an appealing option for investors looking to implement a sector rotation strategy or tilt exposure toward corners of the U.S. market that may perform well during a downturn. As of June 2020, FSTA owned about 90 stocks, including small caps, making it a better-diversified option than the Consumer Staples Select Sector SPDR (XLP), though traders may prefer the size and liquidity of XLP. FSTA is competitively priced compared with rivals like XLP and the Vanguard Consumer Staples ETF (VDC).
