

HYLB

Xtrackers USD High Yield Corporate Bond ETF Analyst Report

The Xtrackers USD High Yield Corporate Bond ETF (HYLB) offers broad exposure to “junk” bonds — debt issued by borrowers with a higher risk of default. For taking on the added risk, investors are rewarded with higher yields than those offered on ultra-safe U.S. Treasuries or investment-grade debt issued by the most creditworthy companies. ETFs offer quite a few high-yield options, including active management, so-called “smart” indexing, and even an ETF that screens junk debt based on environmental, social and government criteria.

HYLB is competitively priced. In fact, it is much cheaper than its largest rivals: the iShares iBoxx \$ High Yield Corporate Bond ETF (HYG) and the SPDR Bloomberg Barclays High Yield Bond ETF (JNK). HYLB has also raised significant assets since its 2016 debut, has decent daily liquidity, and in all is a worthwhile choice for access to the high-yield debt category.
