

IDX

VanEck Indonesia Index ETF

Analyst Report

IDX offers investors exposure to the Emerging market of Indonesia by investing in securities of companies that are based or do a great deal of business in the nation. Since many of the large caps in this fund are likely to not be found in other EM funds, IDX could make for an interesting satellite holding but is probably not appropriate as a core holding in a diversified portfolio. For investors seeking greater exposure to the Indonesian market, IDX is one of the only 'pure play' option available.
