Principal Investment Grade Corporate Active ETF Analyst Report

The Principal Investment Grade Corporate Active ETF (IG) is an actively-managed fund that invests in investment-grade corporate debt denominated in U.S. dollars. The fund is unconstrained and has a duration — a measure of bond price sensitivity to interest rate moves — of about 7.8 years, putting it in the medium-term category. IG's management fee is competitive for the category.

Bonds have been one of the bright spots for active managers, and many bond ETFs manage to outperform their benchmarks — something stock pickers often fail to achieve. IG has a number of competitors in the actively-managed corporate bond space, including the iShares Interest Rate Hedged Corporate Bond ETF (LQDH), the Franklin Liberty Investment Grade Corporate ETF (FLCO), the JPMorgan Corporate Bond Research Enhanced ETF (JIGB), or the iShares Inflation Hedged Corporate Bond ETF (LQDI).
