

JCPB

JPMorgan Core Plus Bond ETF

Analyst Report

The JPMorgan Core Plus Bond ETF (JCPB) is an actively-managed fund that can invest in a wide range of U.S. and non-U.S. debt. The fund invests primarily in investment-grade debt, and the portfolio will not, under normal circumstances, have more than 35% of its assets in riskier high-yield securities. Up to 35% of the portfolio may be in non-U.S. securities, including securities denominated in non-U.S. currencies. Bonds have been one of the bright spots for active managers, and many bond ETFs manage to outperform their benchmarks — something stock pickers often fail to achieve. An investment in JCPB is ultimately a bet on the manager's ability to outperform the market. JCPB is priced competitively with rivals like the SPDR DoubleLine Total Return Tactical ETF (TOTL) and the PIMCO Active Bond ETF (BOND).
