

# JJC

## iPath Series B Bloomberg Copper Subindex Total Return ETN Analyst Report

This fund offers exposure to one of the world's most important industrial metals, copper, potentially giving JJC appeal as an inflation hedge. However, investors should be wary of investing via the futures-based strategy as it is susceptible to contango, a phenomenon that can eat into returns. For investors seeking exposure to copper beyond physical exposure or through a mining firm, JJC is the only pure play choice available.
