

JPME

JPMorgan Diversified Return U.S. Mid Cap Equity ETF Analyst Report

The JPMorgan Diversified Return US Mid Cap Equity ETF (JPME) tracks a broad index of midsize U.S. stocks. The methodology combines risk-based portfolio construction with multi-factor security selection based on value, momentum, and quality. The ETF marketplace has recently seen an explosion of 'factor' funds covering every asset class. Investors can compare it to funds like the John Hancock Multifactor Mid Cap ETF (JHMM). U.S. mid-cap stocks are likely to be a core holding in almost any portfolio and may already be included in broad U.S. equity funds. Investors should ensure they're not doubling down on mid-caps when buying a focused fund like JPME.

This ETF may be more appealing to those in the portfolio construction business. JPME is priced competitively for a multi-factor fund, though there are cheaper plain vanilla options out there, including the Vanguard Mid-Cap ETF (VO), Schwab U.S. Mid-Cap ETF (SCHM), and iShares Core S&P Mid-Cap ETF (IJH). Tactical traders might prefer the size and liquidity of the SPDR Midcap 400 ETF Trust (MDY).
