

MINT

PIMCO Enhanced Short Maturity Active Exchange-Traded Fund Analyst Report

This popular active ETF offers exposure to the ultrashort end of the maturity curve, focusing on corporate debt that matures within one year. MINT is extremely light on both interest rate risk and credit risk, and as such will generally deliver a very low expected return. MINT can be a great safe haven to park assets in volatile markets, and could outperform others in the category, but it has by far the highest expense ratio of the money market funds.
