

# PKW

## Invesco BuyBack Achievers™ ETF

### Analyst Report

This ETF focuses in on companies that have bought back large numbers of shares in the past year. In order to be included, a company must have repurchased at least 5% of its outstanding shares in the past twelve months. PowerShares believes that this system could lead to outperformance as a lower number of shares outstanding will increase the EPS. While not appropriate for all investors, PKW could be a decent satellite holding for those who believe in the power of share buybacks and their impact on EPS and stock price.
