

PWB

Invesco Large Cap Growth ETF

Analyst Report

This ETF is linked to the Dynamic Large Cap Growth Intellidex Index, which offers exposure to large-cap companies within the growth sector of the U.S. equity market. Investors with a longer-term horizon ought to consider the importance of growth stocks and the diversification benefits they can add to any well-balanced portfolio. Companies within the growth segment offer tremendous profit potential since they are still in the early stages of their life cycle, which in turn also raises the risk level associated with this asset class. PWB is designed to provide capital appreciation while maintaining consistent stylistically accurate exposure. The Style Intellidexes apply a rigorous ten factor style isolation process to objectively segregate companies into their appropriate investment style and size universe. Viable alternatives with comparable holdings include VONG and IWY, while SCHG is the cheapest option.
