## FlexShares Developed Markets ex-US Quality Low Volatility Index Fund Analyst Report

### ESG Themes and Scores

FlexShares Developed Markets ex-US Quality Low Volatility Index Fund (QLVD) is part of Northern Trust's stable of factor ETFs. QLVD tracks a proprietary index of companies from developed markets outside the U.S., aiming for a portfolio bias toward quality and reduced volatility. The index methodology first assesses financial strength and stability based on quality metrics like profitability, management efficiency and cash flow. The lowest-scoring companies are excluded. Top holdings include Roche, Nestle and GlaxoSmithKline.

As with many FlexShares ETFs, investors pay a premium for a factor twist, though it's not unreasonably priced for a multi-factor fund. Investors can compare it to some of the other international factor ETFs, such as the WisdomTree Global ex-U.S. Quality Dividend Growth Fund (DNL), the Goldman Sachs ActiveBeta International Equity ETF (GSIE), the Hartford Multifactor Developed Markets ex-U.S. ETF (RODM) or the JPMorgan Diversified Return International Equity ETF (JPIN). Lastly, investors might want to compare returns with a plain-vanilla ex-U.S. fund that charges a fraction of QLVD's management fee, like the Vanguard FTSE All-World ex-U.S. ETF (VEU).
