

SEA

U.S. Global Sea to Sky Cargo ETF

Analyst Report

This unique ETF offers exposure to the global shipping industry focusing on companies that transport or build vessels that move goods around the world's oceans. The fund also includes those that lease or operate tanker, container or specialty chemical ships as well. While the fund would make for a poor core holding, its volatile nature and shipping's correlation to global economic activity could make SEA a decent satellite holding for some investors.
