

SHYL

Xtrackers Short Duration High Yield Bond ETF Analyst Report

The Xtrackers Short Duration High Yield Bond ETF tracks an index of U.S.-dollar denominated “junk” bonds — debt issued by borrowers with a higher risk of default — that are five years or less from maturity. SHYL reduces interest-rate risk by shortening overall duration, a measure of how sensitive a bond is to changes in interest rates. Bond prices typically fall when rates rise. SHYL is priced competitively for the category but lacks the size and daily liquidity of larger rivals like the iShares 0-5 Year High Yield Corporate Bond ETF (SHYG) or the SPDR Bloomberg Barclays Short Term High Yield Bond ETF (SJNK).
