

VONG

Vanguard Russell 1000 Growth ETF

Analyst Report

This ETF is linked to the Russell 1000 Growth Index, which offers exposure to large-cap companies within the growth sector of the U.S. equity market. Investors with a longer-term horizon ought to consider the importance of growth stocks and the diversification benefits they can add to any well-balanced portfolio. Companies within the growth segment offer tremendous profit potential since they are still in the early stages of their life cycle, which in turn also raises the risk level associated with this asset class. Growth stocks may also appeal to those seeking capital appreciation versus dividend income, as companies re-invest earnings. VONG is linked to an index consisting of just over 600 holdings and exposure is tilted most heavily towards technology, while industrials, energy, and consumer goods receive equal weightings. Viable alternatives with comparable holdings include IWF and SCHG.
