

# XLBI

## State Street Materials Select Sector SPDR Premium Income ETF Analyst Report

XLBI is one of State Street's new premium income funds that combines the exposure of their original State Street Materials Select Sector SPDR ETF (XLB) with an active call options overlay. The underlying fund provides access to U.S. materials sector stocks from the S&P 500 as a market-cap weighted index while generating income via covered call options with expirations under one year. At 35 bps, XLBI is certainly not as cheap as the vanilla version XLB's 8 bps, but investors may find the reduced volatility well worth the cost.
