

XPP

ProShares Ultra FTSE China 50

Analyst Report

This ETF offers 2x daily long leverage to the FTSE/Xinhua China 25 Index, making it a powerful tool for investors with a bullish short-term outlook for Chinese equities. Investors should note that XPP's leverage resets on a daily basis, which results in compounding of returns when held for multiple periods. XPP can be a powerful tool for sophisticated investors, but should be avoided by those with a low risk tolerance or a buy-and-hold strategy.
