

# AFLG

## First Trust Active Factor Large Cap ETF

### Fund Description

AFLG is an actively managed portfolio of factor-focused US large-cap companies seeking capital appreciation.

### FactSet Analyst Report

AFLG constructs its portfolio by using a multi-factor quantitative methodology with active risk management to screen US companies in the large-cap space. Securities selected are exhibiting exposures to one or more investing factors value, momentum, quality, and low volatility. AFLG being actively-managed, the advisor is able to alter the investing factors used in the portfolio construction in response to changes in market conditions, emergent academic research or other considerations, in addition to managing risk exposure.
