

# AGRW

## Allspring LT Large Growth ETF

### Fund Description

AGRW is an actively managed portfolio of large-cap growth US companies. The fund utilizes a proprietary, fundamental approach to investing.

### FactSet Analyst Report

AGRW is actively managed and aims for long-term capital appreciation by primarily investing in equity securities of large-cap US companies, specifically those within the S&P 500 Index's market capitalization range. The fund employs a disciplined process that combines fundamental analysis with a proprietary valuation framework to identify price inefficiencies in high-quality growth companies. The fund invests across a proprietary set of growth classifications, including core, consistent, cyclical, and emerging growth, while considering material ESG risks. The fund may sell a security when it meets or exceeds valuation expectations, if the issuer's fundamentals deteriorate, or to pursue a more attractive investment opportunity. The adviser may also utilize futures contracts to equitize cash. The fund is non-diversified.
