

AIQ

Global X Artificial Intelligence & Technology ETF

Fund Description

AIQ tracks a market-cap-weighted index of developed-market equities involved in artificial intelligence & big data.

FactSet Analyst Report

AIQ is passively managed to invest in developed market companies that are involved in the use of artificial intelligence to analyze big data, whether for their own operations, as a service to other companies, or through the production of related hardware. The fund determines this classification based on a composite analysis of public filings, products and services, official company statements, and other information regarding direct involvement in the artificial intelligence and big data categories. AIQs constituents are market cap weighted with a semi-annual re-weighting and are reconstituted annually.
