

# AMYY

## GraniteShares YieldBOOST AMD ETF

### Fund Description

AMYY is actively managed seeking current income and the daily 2x leverage of the price performance of Advanced Micro Devices, Inc. (AMD). The fund sells put option and holds other AMD-leveraged ETFs. AMD is a global semiconductor company that designs and produces computer processors, graphics cards, and related technologies.

### FactSet Analyst Report

AMYY aims to pay weekly distributions based on the put option writing strategy. The ETF is actively managed, holding indirect exposure to AMD-leveraged ETFs. It seeks 200% of the daily percentage change of the AMD ETF, with capped gains. Regulatory constraints on risk might force strategy adjustments. The fund does not guarantee success and excludes direct investment in the AMD ETF, leaving potential losses without premium offset. The underlying AMD ETF targets 2x the daily stock performance, with long-term returns affected by daily rebalancing and compounding. The funds exposure ties closely to the semiconductors industry due to the single underlying stock focus.
