

AVSD

Avantis Responsible International Equity ETF

Fund Description

AVSD actively invests in companies of all market capitalizations in developed markets outside of the US. Holdings are screened for multiple ESG metrics and selected based on fundamental criteria.

FactSet Analyst Report

AVSD limits its investable universe of stocks in developed markets ex-US by first screening out those that do not meet multiple ESG metrics. Portfolio managers utilize third party ESG data and scoring systems combined with a proprietary screening model to exclude stocks from investment consideration. The companies remaining are evaluated based on fundamental criteria, selecting stocks perceived to have higher profitability or lower valuations. As a result, the portfolio tends to overweight small-cap growth stocks. Holdings may include securities denominated in foreign currencies. Eligibility for inclusion is determined at the time of purchase. Should the ESG assessment of a portfolio holding change, the fund managers are not obligated to sell the security. The fund performance relies on efficient portfolio management and trading process to reduce unnecessary risks and transaction costs. The fund is able to engage in securities lending.
