

BBBL

BondBloxx BBB Rated 10+ Year Corporate Bond ETF

Fund Description

BBBL tracks a market value-weighted index of BBB-rated, USD-denominated corporate bonds with at least 10 years remaining in maturity.

FactSet Analyst Report

BBBL is designed to mirror the performance of corporate bonds within the lower half of the investment-grade spectrum. Specifically, the fund targets BBB-rated, fixed-rate, USD-denominated corporate bonds that have at least 10 years remaining maturity. With a market value-weighted approach, the index includes bonds from both US and non-US issuers, particularly those in the industrial, utility, and financial sectors. Up to 20% of the investments may comprise futures, options, swaps, US Treasuries, cash and cash equivalents, and securities of other companies, including ETFs. Additionally, the fund will hold privately issued securities. The index undergoes rebalancing every month on the last business day.
