

BBCB

JPMorgan BetaBuilders USD Investment Grade Corporate Bond ETF

Fund Description

BBCB seeks to track a market-cap weighted index to provide exposure to high-yield, USD-denominated corporate debt securities. The fund invests in securities with maturities of at least 18 months.

FactSet Analyst Report

BBCB seeks to track the Bloomberg US Corporate Bond Index, to provide exposure to investment grade, USD-denominated corporate bonds and publicly-issued debt securities. The index selects and weights component securities using their market value. BBCB does not target a specific maturity and duration range when selecting components for the fund. The fund may invest in USD-denominated foreign securities and derivatives to hedge various investments. Prior to Feb. 1, 2023, this fund was actively managed, and was named JPMorgan High Yield Research Enhanced ETF, with a ticker of JIGB.
