

BIBL

Inspire 100 ETF

Fund Description

BIBL tracks a market-cap-weighted index of large-cap US stocks, selected based on a proprietary definition of biblical values.

FactSet Analyst Report

BIBL holds US large-cap stocks that align with the index providers definition of biblical values and positive impact on the world, measured using various environmental, social, and governance criteria. The methodology excludes stocks with any degree of participation in activities such as abortion, gambling, alcohol, tobacco, pornography, the LGBT lifestyle, or rights violations. The index provider analyzes publicly available data on each company's primary business activities, products, and services to assign a proprietary Impact Score. The index selects the 100 highest scoring securities and weights them by market-cap. Index components are reviewed semi-annually and rebalanced annually. Between March 30 and August 19, 2022, the fund's name included a reference to 'ESG'. The name changes did not impact the fund strategy.
