

BLGR

Bluemonte Large Cap Growth ETF

Fund Description

BLGR provides exposure to large-cap growth companies through a fund-of-funds approach. The actively managed fund uses both a top-down and bottom-up approach to select equities.

FactSet Analyst Report

BLGR seeks capital growth by investing in unaffiliated ETFs with exposure to large-cap growth companies. The underlying funds may be passively or actively managed, investing in US and/or non-US equities that appear to have above-average growth rates for earnings, sales, or cash flow. The fund employs a top-down approach, utilizing macro analysis. Through a fundamental analysis, the fund then employs bottom-up research to select investments. The sub-adviser identifies and determines the desired allocation mix and return profile, selecting funds believed to represent an asset class, are reasonably priced, and reflect relative performance when compared to similar ETFs. In assessing actively managed ETFs, the fund-of-funds performs additional analysis of the quality and tenure of an underlying funds management. As an actively managed ETF, the fund manager has full discretion to adjust the portfolio at any time.
