

# CGUS

## Capital Group Core Equity ETF

### Fund Description

CGUS is actively managed to invest in companies believed to have the potential for appreciation and/or dividends.

### FactSet Analyst Report

CGUS actively invests in common stocks of companies that the adviser believes have the potential for appreciation and/or dividends. Up to 15% of the funds assets may be allocated towards issuers outside the US. This fund is non-diversified and heavily relies on the advisers judgement regarding decisions affecting the portfolio, which favors attractively valued companies that represent good, long-term investment opportunities. The portfolio uses a multi-manager approach, each handling their own segments within the portfolio.
