

CHIH

Global X MSCI China Health Care ETF

Fund Description

CHIH tracks a market cap-weighted index of Chinese large- and mid-cap companies in the health care sector. The index includes A shares.

FactSet Analyst Report

CHIH offers straightforward exposure to Chinese health care firms. It doesn't try to pick winners, opting instead for no-nonsense exposure to the sector. Its broad share class coverage includes access to A-Shares. The underlying index uses GICS classification to identify stocks for the sector. Stocks receive float-adjusted cap weighting, thus ignoring any portion of the firm owned by the government. Its diversification scheme caps the largest firm at 10% and other larger firms under 50% in aggregate. The underlying index is reconstituted and re-weighted quarterly.
