

DIVY

Sound Equity Dividend Income ETF

Fund Description

DIVY is an actively managed, narrow portfolio, of US large- and mid-cap stocks, fundamentally selected for capital appreciation and dividend yield.

FactSet Analyst Report

DIVY aims to provide current income and long-term capital appreciation by actively selecting a small portfolio of US stocks. The funds advisor focuses on companies believed to have favorable fundamentals such as low P/E ratios, positive cash flows, manageable leverage ratios and high dividend yields for portfolio inclusion. Stocks are also selected based on perceived catalysts for appreciation such as new management, new products, corporate restructuring, recapitalization or market dynamics. The objective is to create a portfolio with an aggregate dividend yield that is twice that of the S&P 500 Index. Prior to April 03, 2023, the fund traded under the ticker SDEI. On July 24, 2023, it changed its fund name from Sound Equity Income ETF to Sound Equity Dividend Income ETF.
