

# EDUT

## Global X Education ETF

### Fund Description

EDUT tracks a market-cap-weighted index of global companies providing products and services that facilitate education.

### FactSet Analyst Report

EDUT provides a unique take on equities with high exposure to the education theme. Companies that facilitate digital learning, educational content publishing, for education at all levels around the world falls under this theme. EDUT undertakes extensive research to identify education companies based on industry reports, investment research and consumer data. Revenue-based company analysis is conducted to identify pure-play companies with greater than 50% revenues derived from facilitating education. The underlying index is constructed by selecting and weighting the top 100 pure-play companies by market cap. Single securities are capped at 10%. The index is rebalanced and reconstituted semi-annually.
