

EV

Mast Global Battery Recycling & Production ETF

Fund Description

EV seeks to track an index of companies that may benefit from growth and innovation in the global battery value chain. Stocks are selected based on amount of revenue or assets directly tied to the investment theme, weighting more heavily towards those involved in battery recycling and ranked by market-cap.

FactSet Analyst Report

EV seeks to track an index of companies that may benefit from growth and innovation in the global battery value chain. Stocks are selected based on amount of revenue or assets directly tied to the investment theme, weighting more heavily towards those involved in battery recycling and ranked by market-cap.
