

FFIU

UVA Unconstrained Medium-Term Fixed Income ETF

Fund Description

FFIU is an actively managed portfolio of a broad array of fixed income securities with dollar-weighted average effective duration between three and seven years.

FactSet Analyst Report

FFIU invests in fixed income securities with a targeted dollar-weighted average effective duration between three and seven years. Managed by Universal Value Advisors, the fund broadly covers the space by investing in fixed income securities that are mainly investment grade, of any maturity or duration, that include bonds, debt securities, and other income-producing instruments by governments or private-sector entities. Investments could also include corporate debt obligations, asset-backed securities, foreign securities, inflation-indexed bonds, and preferred securities. As an actively managed fund, FFIU may make certain investment decisions at their discretion.
