

# FFOG

## Franklin Focused Growth ETF FOCUSED GROWTH ETF

### Fund Description

FFOG actively invests in equities perceived to have strong fundamentals and prospects for growth. The fund does not limit investments to any particular market-cap, industry or geography.

### FactSet Analyst Report

FFOG is an actively managed fund that invests predominantly in equities believed to be attractive growth opportunities. The fund selects 20 to 50 securities based on a research-driven, bottom-up approach, prioritizing those with strong historical and potential growth in revenues, quality of management, and strategic position within the industry. These equities may be from any market-capitalization, with no industry restrictions. Up to 25% of the fund may be invested in foreign securities, including those in emerging markets. FFOG is non-diversified, and may hold a significant portion of its assets in a particular industry, based on managers discretion and economic conditions. Prior to Nov. 3, 2023, the fund operated as an open-end mutual fund. The fund has an identical investment goal and substantially similar investment strategies as the predecessor mutual fund.
