

# HUMN

## Roundhill Humanoid Robotics ETF

### Fund Description

HUMN seeks capital appreciation by actively managing a portfolio of global companies involved in developing and manufacturing humanoid robotics.

### FactSet Analyst Report

HUMN provides global equity exposure to Humanoid Robotics. These companies manufacture humanoid robotics or develop, produce, and supply critical hardware and software technology essential to humanoid robots, such as precision actuators, AI locomotion stacks, tactile sensors, and power systems. A company qualifies for selection if it has achieved commercial production or has produced a fully functional prototype of a humanoid robot or critical technological input. The funds adviser prioritizes companies with higher levels of thematic relevance based on its research on a companys publicly available documents. The advisor sets liquidity and tradability requirements and rebalances weights quarterly. The fund may invest in foreign companies through investments in depositary receipts, ADRs, VIEs, and China A-Shares.
