

IBTL

iShares iBonds Dec 2031 Term Treasury ETF

Fund Description

IBTL tracks a market-value-weighted index of US Treasury bonds maturing between January and December 2031. The fund will terminate in December 2031.

FactSet Analyst Report

IBTL is part of iShares' Treasury Term Bond suite. The fund tracks the performance of a held-to-maturity portfolio of US treasuries with maturities between January 1, 2031 and December 15, 2031. Instead of the perpetual maturity range of a typical bond fund, IBTL provides exposure to a specific maturity date, similar to an individual bond. As the fund approaches its maturity date, duration and YTM will continue to decline. On its target date December 15, 2031, the fund will unwind remaining positions and return capital to shareholders. This structure permits the fund to be used as a building block for a bond ladder, or to plan for a future need.
