

# IDRV

## iShares Self-driving EV & Tech ETF

### Fund Description

IDRV tracks a market-cap selected and weighted index of equities related to self-driving vehicles.

### FactSet Analyst Report

IDRV focuses on companies that produce autonomous driving vehicles, electric vehicles, batteries for electric vehicles, or technologies related to such products. The list of industrials covered include autonomous and electric vehicle manufacturers, autonomous driving technologies companies, electric vehicle battery producers, electric vehicle battery materials producers, and electric vehicle charging and components producers. The fund allows for stocks from both developed and emerging economies, as well as companies of all market cap sizes. The index will be reviewed and reconstituted annually and rebalanced semi-annually.
