## iShares 1-5 Year Investment Grade Corporate Bond ETF

### Fund Description

IGSB tracks a market-value-weighted index of US dollar-denominated, investment-grade corporate debt with 1-5 years remaining in maturity.

### FactSet Analyst Report

IGSBs mostly vanilla portfolio of short-term, investment-grade corporate debt is hugely popular with investors. The fund holds longer-dated bonds than our benchmark and most competitors, increasing both yield and interest rate risk. Still, it does a great job of representing this expanded short-term bond space. IGSB typically favors higher-quality bonds, usually resulting in a fund with lower credit risk than our benchmark. Its huge asset base ranks it among the top fixed income ETFs by AUM. The funds popularity extends to the trading floor investors large and small can access IGSB efficiently. Prior to August 1, 2018, IGSB tracked the Bloomberg Barclays US 1-3 Year Credit Bond Index.
