

JEMA

JPMorgan ActiveBuilders Emerging Markets Equity ETF

Fund Description

JEMA is an actively-managed fund utilizing emerging market equity strategies across countries, regions, styles, and market capitalizations.

FactSet Analyst Report

JEMA will generally invest at least 80% of its assets in equity and equity-related instruments that are economically-tied to emerging markets with notable significant exposure in the China region, South Korea, and India. To manage the portfolio, the fund adviser makes use of a top-down and bottom-up approach as well as a proprietary multi-factor model based on risk/return analysis and relative value considerations. Overall, JEMA seeks to outperform the MSCI Emerging Markets Index over time while maintaining similar risk characteristics. Prior to July 08, 2021, the fund was named JPMorgan Emerging Markets Equity Core ETF.
