

JETU

MAX Airlines 3X Leveraged ETNs

Fund Description

JETU tracks 3x the daily price movements of an index consisting of US-listed companies in the air transportation industry, these include airlines, air freight and logistics, and aircraft and parts manufacturing. The index is selected and weighted by market cap.

FactSet Analyst Report

JETU is a bullish bet on the US airport transportation industry. It provides daily 3x exposure to an index of firms involved in airlines, aircraft and aircraft parts manufacturers, airfreight and logistics, aircraft leasing, and airline and airport operations. The index defines the industries based on the NAICS and selects US-listed equities, excluding ETPs and MLPs. The index also excludes Canadian and Chinese issuers. For the aircraft and parts manufacturing industry, only the five largest companies are included. Airfreight and Logistics companies must disclose in their recent annual report that they own aircraft to execute their core business activity. The index is a modified liquidity-weighted index, which ranks the constituents, based on highest average daily value traded. As a geared product, JETU is designed as a short-term trading tool and not a long-term investment vehicle. Long-term returns could materially differ from those of the index due to daily compounding.
