

JSTC

Adasina Social Justice All Cap Global ETF

Fund Description

JSTC is an actively managed fund of global companies screened for social justice criteria.

FactSet Analyst Report

JSTC offers exposure to global companies of all market-caps whose business operations meet the Adasina Social Justice investment criteria. The fund will primarily invest in the securities of the Adasina Social Justice Index. The index selection universe starts with approximately 9,000 publicly traded companies and excludes those not aligned with certain social standards regarding race, gender, economic, climate, and movement aligned with social equity. These criteria are established by means of datasets gathered from community-sourced social justice organizations. The index is reviewed on a semi-annual basis. However, the fund is actively managed in order to have the flexibility to select or remove constituents without the index-tracking constraints.
