### FactSet Analyst Report

LIAJ invests in US Treasury securities, mainly TIPS, aiming for predictable cashflows through 2056. In 2036, investors can opt for Longevity-Linked Distributions via a closed-end fund with payments up to age 100 or Term Distributions continuing through 2056, or a mix. Both Fund and closed-end funds aim to liquidate by 2056, distributing all assets then ceasing distributions. Initially, monthly payouts are \$0.0833 per share, adjusted for inflation, until 2036 when it recalibrates to approximately \$0.0760 monthly until 2056. Inflation adjustments are based on the Consumer Price Index and distributions are made around the 3rd business day each month. A portion of each monthly distribution is considered return capital, reducing the amount for investment and lowering the investor's tax basis in their shares.
