

# LIBD

## Stone Ridge 2065 Inflation-Protected Longevity Income ETF

### Fund Description

LIBD actively manages US Treasury exposure, aiming to provide reliable monthly realized inflation-adjusted distributions through 2065. The fund is designed to appeal to investors born in 1965 and reaching age 100.

### FactSet Analyst Report

LIBD invests in US Treasury securities, mainly TIPS, aiming for predictable cashflows through 2065. In 2045, investors can opt for Longevity-Linked Distributions via a closed-end fund with payments up to age 100 or Term Distributions continuing through 2065, or a mix. Both Fund and closed-end funds aim to liquidate by 2065, distributing all assets then ceasing distributions. Initially, monthly payouts are \$0.0833 per share, adjusted for inflation, until 2045 when it recalibrates to approximately \$0.0760 monthly until 2065. Inflation adjustments are based on the Consumer Price Index and distributions are made around the 3rd business day each month. A portion of each monthly distribution is considered return capital, reducing the amount for investment and lowering the investor's tax basis in their shares.
