

# MENV

## AdvisorShares North Square McKee ESG Core Bond ETF

### Fund Description

MENV is an actively managed fund that seeks to outperform the Barclays Capital U.S. Aggregate Bond Index while incorporating ESG screens.

### FactSet Analyst Report

MENV offers investors a broadly diversified global bond exposure. The fund seeks to invest directly in fixed income securities that provide risk-controlled exposure across the broad market, combined with consideration for environmental, social, and corporate governance factors. Securities selected may be of any credit quality and duration, without limitations. As an actively managed fund, portfolio managers ultimately make the investment decisions at their discretion to pursue fund objectives. On November 1, 2021 the fund changed its ticker from FWDB and fund of funds strategy that used a proprietary algorithm to select portfolio exposure.
