

MMID

MFS Active Mid Cap ETF

Fund Description

MMID is actively managed, seeking capital appreciation through investments in US mid-cap companies. Security selection combines fundamental analysis with quantitative screening tools.

FactSet Analyst Report

MMID aims to maximize growth and value opportunities within the US mid-cap equity market, primarily through common stocks. Security selection uses a bottom-up investment approach that combines fundamental analysis of individual companies with quantitative screening tools. The strategy aims to uncover the best stock opportunities. The fund is not restricted to any specific style, allowing portfolio allocation to growth stocks, value stocks, or a blend of both. Investments may include foreign securities.
