

MNTL

Tema Neuroscience and Mental Health ETF

Fund Description

MNTL is actively managed, concentrating on companies engaged in addressing disorders of the central nervous system and mental health worldwide. Using both top-down and bottom-up stock selection, the fund identifies innovative companies deemed attractive.

FactSet Analyst Report

The security is being delisted. The last day of trading on an exchange is July 30, 2025. MNTL seeks long-term capital growth by targeting 15 to 100 pure-play companies contributing to neuroscience and mental health. This includes firms involved in pharmaceuticals, emerging biotech, medical devices, and healthcare services. The fund aims to identify growth opportunities within the thematic universe. It uses a two-fold strategy that includes both top-down fundamental sector research and quantitative tools, as well as bottom-up security analysis. As part of the strategy, ESG considerations are integrated to optimize profits and manage potential risks. Overall, the fund utilizes a comprehensive research and analysis approach that combines internal research, company disclosures, and publicly available sources to assess eligibility. While holdings may include global stocks, a significant portion is expected to be directed toward the US and Europe. The fund may engage in lending transactions.
