

# NDVG

## Nuveen Dividend Growth ETF

### Fund Description

NDVG is an actively managed, non-transparent ETF that primarily holds dividend-paying equities from around the globe.

### FactSet Analyst Report

NDVG is an actively managed fund that will not disclose its holdings on a daily basis-- rather, it will only publish a proxy portfolio, with actual holdings disclosed monthly with a 30-day lag. The fund aims to invest in dividend-paying equity securities, which include companies that have paid a dividend within the last twelve months and/or announced a dividend to be paid in the next twelve months at the time of purchase. Given the funds strategy, NDVG may occasionally have greater exposure to certain sectors and industries that yield higher dividends. Companies of all sizes are eligible for inclusion, and up to 25% of the fund may be invested in non-US issuers trading on a foreign exchange.
