

# POTX

## Global X Cannabis ETF

### Fund Description

POTX tracks an index of developed market companies related to cannabis, hemp & CBD.

### FactSet Analyst Report

POTX offers straightforward exposure to cannabis equities in developed markets. The funds underlying index targets pure-play firms of any capitalization with at least 50% of revenue, earnings or assets in the production and distribution of cannabis & hemp, financial services that support the industry, and pharmaceutical applications. The index also has a forward-looking aspect: companies expected to meet these conditions in the future are eligible, and are classified in a pre-revenue category. The language emphasizes that all firms must be publicly-traded, legally-operating businesses. Stocks are selected and weighted based on market-cap, with the 40 highest ranked pure-play firms and 10 highest ranked pre-revenue firms included in the portfolio. The index is reconstituted and rebalanced on a quarterly basis.
