

PRXG

Praxis Impact Large Cap Growth ETF

Fund Description

PRVG is an actively managed fund of equity securities, issued by large-cap US companies, exhibiting growth characteristics. It selects stocks in line with its stewardship investing core values.

FactSet Analyst Report

PRVG provides exposure to the large-cap segment of the US equity market. It specifically targets growth stocks while implementing principles-based screens to identify and select companies in sync with its core values. These values consider individuals, communities, and environments impacted by investment decisions, as well as sustainability, ethical, and corporate issues. The fund employs several strategies, dubbed ImpactX, to support its investing philosophy. It also utilizes optimization techniques to limit risk factors between the fund and its benchmark index. The fund will typically comprise 125 to 200 issuers, subject to concentration risk. Note that it seeks to invest more than 80% of the value of its assets in the constituents of its benchmark. PRVG launched alongside its sister fund, PRVX, focusing on value stocks.
