

# QQMG

## Invesco ESG NASDAQ 100 ETF

### Fund Description

QQMG tracks an index of NASDAQ-100 stocks screened and weighted based on various environmental, social, and governance criteria.

### FactSet Analyst Report

QQMG provides exposure to NASDAQ-100 stocks utilizing an ESG overlay. Eligible securities comprise 100 of the largest domestic and international, non-financial companies listed on NASDAQ. The fund initially screens out companies involved in controversial business activities, as determined by Sustainalytics. Firms ESG profiles are then assessed using corporate filings and public disclosures to remove companies with high business controversy levels and high ESG Risk Rating Scores. Companies must also comply with the principles of the UN Global Compact. Remaining securities are selected for inclusion and are weighted according to a combination of their ESG Risk Rating Scores and market capitalizations. The index rebalances and reconstitutes quarterly. QQMG adds an ESG offering to Invesco's QQQ Innovation Suite.
