

RODI

Barclays Return On Disability ETN

Fund Description

RODI tracks an index of 100 equally-weighted US firms with positive treatment toward disabled people regarding their workers, customers and productivity.

FactSet Analyst Report

This ETN will be called on 28/12/2022.RODI focuses on large-cap US firms that do right by disabled people. RODI's index screens US stocks according to size, liquidity, and financial viability (positive reported earnings for four consecutive quarters). Eligible firms are then scored based on three criteria related to disabled people: hiring and workplace conditions, tools and process for workers, and products and services. The weight of each score varies depending on the firm's industry classification. After ranking by these scores, the top 100 stocks make the cut and receive equal weights. The index constituents are rebalanced quarterly.
